

Folding A Topographic Map Properly

1. Lay your map flat and face up

2. Fold/crease lengthwise into fanfold strips as indicated above. The map should fold like an accordion.

3. Your folded map should now look like this.

4. Make sure that the Livermore title is facing up on both the top and bottom of the map.

5. Fold/crease as indicated above. Again, the map should fold like an accordion.

6. Your folded map should now look like this.

- 0** *Your map should fold like an accordion in both directions,*
very simply, no complicated map folding..., it's not origami
- 0** The Livermore Map title should be showing on both sides of your folded map
(see next page of these instructions)
- 0 7.** PRINT your name, in ink, near the Livermore Title on both the top and bottom of the map.
Everyone in this class (and other classes) has a copy of this map. The ones with no names belong to whoever asks for them.

[illegible]
