

Folding the Joshua Tree composite map to fit a 1 gallon Ziploc bag

In all cases fold under leaving the topographic map side of the paper exposed

1. Fold the bottom inch of the map under
2. Fold the map under along the fourth blue horizontal UTM line from the bottom (UTM 3764000)
3. Fold the map in half along the ninth blue horizontal UTM line from the top (UTM 3770000)
4. Fold the top of the map under as tight as you can. This should be just above the third blue horizontal UTM line from the top (UTM 3776000)
5. Fold in half along the blue vertical line sixth from the left (UTM 575000) leaving "Indian Cove" exposed
6. Fold under along the blue vertical line second from the right (UTM 581000)
7. Fit map into a 1 gallon Ziploc style closure bag with the 'Indian Cove' side of the map showing through the clear side of the bag. Smash it flat. Clip the "closure" portion of the bag onto your clipboard. Yer good to go
